

Subject: Building Professional Technical English

Date: Tuesday 190917

Lecture: PLANNING

ASSIGNMENT 2, Group work.

"The process of building a one family house".

Translate (if needed) into Chinese the following technical words/terms related to the construction of a single-family house:

1. Roof tiles
2. Wall ties (brick ties)
3. Outer wall, inner leaf
4. Outer wall, outer leaf
5. Excavation of soil
6. Roof construction including insulation
7. External door
8. Ground floor slab
9. Foundation
10. Ceiling
11. Arrange the garden outside
12. Wall insulation
13. Air conditioning
14. Mortar rendering (internal)
15. Wall paint (internal)
16. Ground floor insulation
17. Windows

TASK: After translating and understanding the above terms, list them in a correct order in a way the building should be built (what comes first, what comes next etc.)

Create a process diagram with boxes and connection lines where all the above activities are shown in correct order.

Discuss the process in your group and prepare a presentation of the result and process diagram.
